NEW MARINE ARCHITECTURE -The new ocean steamship Mackinaw, which is destined to carry on a coal trade between Philadelphia and Boston, was built at West Bay City, Mich., and before she was taken from the yards was cut equarely into two pieces. This was necessary because the vessel was too large for the cana's through which she would have to pass to reach the scaboard. In one piece were the engines and mizzenmast, and in the other the forward part of the steamer, with the main and foremast. Tugs were used to tow the monster chasks of iron, wood and steel along, and in this way the ship has been brought as far as the Lachine Canal Basin. She will proceed to Montreal, where the two pieces will be riveted together again. when the run to Philadelphia and Noriok will be reade. The capacity of the Mackinew in 3 000 tons of coal. The builders say that the new steamer will less as long to the state of the stat and endure just as terrific storms when she gets to sea as if she had never been cut in two.

S. S. S. has relieved me of a terrible scrofula
from which I had suffered for years. It affected
my nose first as catarrh, then caries of the bone,
and continued to eat until it destroyed the soft
bone in the right side of the nose, then went to
my throat and later on to my lungs, and it looked
as if I was doomed. S. S. S. has cured me, and
has also cured my little daughter of the same
disease. MRS. N. RITCHEY, Mackey, Ind.
